

Ryan Expands Acreage Near Local Plant

Long-range plans of the Ryan Aerautical Co., San Diego, for continued expansion of its production capability were implemented today with acquisition of 11 additional acres of land at the firm's Torrance division.

T. Claude Ryan, president, said that the company now occupies or has available for future use plant sites totaling 50 acres in four major locations—Lindbergh Field, San Diego; Kearny Mesa, San Diego; Inglewood, and Torrance. In addition, several large warehouses are being utilized by Ryan in the metropolitan San Diego area.

All manufacturing, office and warehousing facilities under the Ryan banner today total approximately 1,000,000 square feet, with considerable additional plant site space now available in which to expand as the company's increasing production research and develop-

ment activities require.

Plants Grow

At the main plant on Lindbergh Field, are 50 acres, with 110,000 square feet under roof. The rapidly growing electronics division on Kearny Mesa has a 30,000 square foot building on 7 acres, with 2½ more acres under option.

The transaction at Torrance, announced today, brings Ryan's total buildings to 23 acres at that site adjacent to the Torrance Municipal Airport. The new acquisition adjoins the 27 acres originally obtained by Ryan last year. Since then the existing group of buildings has been augmented by three large structures providing a total of 280,000 square feet of production and office space at Torrance, which now is the final assembly plant for the famed Ryan Firebee remote-controlled jet target drone.

In Inglewood, Ryan operates

a machine shop for machining aircraft parts requiring such highly specialized equipment as three dimensional profiling machines.

Meanwhile, Ryan is continuing to negotiate for acquisition of other facilities to accommodate its constantly growing widely diversified operations, including manufacturing of huge air fuselage sections for Boeing KC-135 jet tanker-transport, jet engine pod and pylons assemblies for the Douglas DC-8 Jetliners; automatic electronic navigational systems; Firebee drones, rocket engines, jet engine components, Boeing B-52 bomber thrust braces; development of vertical take-off and landing (VTOL) planes, and other projects.

Station Sets Opening Date

A three-day grand opening celebration concluding with a new "Marine Station" at Torrance will take place July 24-26.

Bill Desarie, from a family of early Torrance settlers, is the independent neighborhood dealer who will operate the new facility at 2198 Arlington, corner of Sepulveda Blvd.

As part of the celebration, customers will receive registered key chains and opportunities to win Firestone auto accessory items, appliances and lubrication services.

Surviving are his wife, Ma-
bel H. Cochr of Torrance; a son, Riley of Hermosa Beach; two daughters, Marie Toenick Koetter of St. Louis, Mo., and June Stanwood of Riverside; eight grandchildren and a brother.
